

Bill Summary

The National Medical Commission Bill, 2017

- The National Medical Commission Bill, 2017 was introduced by the Minister of Health and Family Welfare, Mr. J. P. Nadda in Lok Sabha on December 29, 2017. The Bill seeks to repeal the Indian Medical Council Act, 1956 and provide for a medical education system which ensures: (i) availability of adequate and high quality medical professionals, (ii) adoption of the latest medical research by medical professionals, (iii) periodic assessment of medical institutions, and (iv) an effective grievance redressal mechanism. Key features of the Bill include:
 - **Constitution of the National Medical Commission:** The Bill sets up the National Medical Commission (NMC). Within three years of the passage of the Bill, state governments will establish State Medical Councils at the state level. The NMC will consist of 25 members, appointed by the central government. A Search Committee will recommend names to the central government for the post of Chairperson, and the part time members. These posts will have a maximum term of four years. The Search Committee will consist of seven members including the Cabinet Secretary and three experts nominated by the central government (of which two will have experience in the medical field).
 - Members of the NMC will include: (i) the Chairperson, (ii) the President of the Under-Graduate Medical Education Board, (iii) the President of the Post-Graduate Medical Education Board, (iv) the Director General of Health Services, Directorate General of Health Services, (v) the Director General, Indian Council of Medical Research, and (vi) five members (part-time) to be elected by the registered medical practitioners from amongst themselves from the prescribed regional constituencies under the Bill.
 - **Functions of the National Medical Commission:** Functions of the NMC include: (i) framing policies for regulating medical institutions and medical professionals, (ii) assessing the requirements of healthcare related human resources and infrastructure, (iii) ensuring compliance by the State Medical Councils of the regulations made under the Bill, (iv) framing guidelines for determination of fees for up to 40% of the seats in the private medical institutions and deemed universities which are regulated as per the Bill.
- **Medical Advisory Council:** Under the Bill, the central government will constitute a Medical Advisory Council. The Council will be the primary platform through which the states/union territories can put forth their views and concerns before the NMC. Further, the Council will advise the NMC on measures to enable equitable access to medical education.
- **Autonomous boards:** The Bill sets up certain autonomous boards under the supervision of the NMC. Each autonomous board will consist of a President and two members, appointed by the central government. These boards are: (i) the Under-Graduate Medical Education Board (UGMEB) and the Post-Graduate Medical Education Board (PGMEB): These Boards will be responsible for formulating standards, curriculum, guidelines, and granting recognition to medical qualifications at the undergraduate and post graduate levels respectively, (ii) the Medical Assessment and Rating Board (MARB): The MARB will have the power to levy monetary penalties on medical institutions which fail to maintain the minimum standards as laid down by the UGMEB and the PGMEB. The MARB will also grant permission for establishing a new medical college, and (iii) the Ethics and Medical Registration Board: This Board will maintain a National Register of all licensed medical practitioners, and regulate professional conduct. Only those included in the Register will be allowed to practice medicine.
- **Entrance examinations:** There will be a uniform National Eligibility-cum-Entrance Test for admission to under-graduate medical education in all medical institutions regulated by the Bill. The NMC will specify the manner of conducting common counselling for admission in all such medical institutions.
- There will be a National Licentiate Examination for the students graduating from medical institutions to obtain the license for practice. The National Licentiate Examination will also serve as the basis for admission into post-graduate courses at medical institutions.
