(2) Every order made under this section shall be laid, as soon as may be, after it is made, before the State Legislature.

STATEMENT OF OBJECTS AND REASONS

Breeding of cattle and buffaloes with use of bovine liquid semen for artificial insemination has been in practice in the State since the early years of 1940's decade. Thereafter, due to improvement in the technology, the frozen semen is being used since early years of decade of 1980 and same is still prevalent. The artificial breeding of cattle and buffaloes has aimed at carrying out breed improvement as well as crossbreeding for improving the production potential of the progeny, increase in milk production and increase in power of bulls or bullocks along with increased endurance and adaptability for climatic changes and also for increased capability for disease resistance.

As per the policy adopted by the State Government, crossbreeding of non-descript cows and up-graded non-descript buffaloes for increasing milk production potential in the progeny has been systematically carried out in the State of Gujarat since the early years of the decade of 1970's. However, there is no adequate regulation for controlling the quality of bovine semen used for breeding through natural service and artificial insemination, in the State. Transportation and use of low-quality semen from other States into the State of Gujarat, haphazard and indiscriminate use of inferior bull and bull with unknown diseases status, haphazard and indiscriminate use of semen straws by artificial insemination technicians is an issue of great concern for deteriorating the quality of breeding and also the progeny born out of such breeding. Therefore, strict check on the quality of the semen, disease free status of the bulls used for production of semen, etc. is the need of time and it can only be brought in reality through the suitable legislation. The Government, therefore, considers it expedient to enact a law for regulation of the bovine and other animals breeding activities in the State.

The Bill seeks to achieve the aforesaid objectives.

The following notes on clauses explain, in brief, some of the important provisions of the Bill: -

Clause 1.- This clause provides for extent, application and commencement of the Act.
